EDUCATION

The Ohio State University

Bachelor of Science in Electrical and Computer Engineering

Columbus, OH

Expected May 2027

Columbus State Community College

Associate of Science - Computer Science

Columbus, OH

August 2022 - May 2024

Awards: Dean's List, CSCC Development Foundation Partnership Scholarship Winner

Certifications: IBM - Use Generative AI for Software Development Using IBM watsonx, Anthropic - AI Fluency Framework & Foundations

Relevant Coursework: Data Structures & Algorithms, Software Development, Computer Design, Engineering Mathematics & Statistics, Linear Algebra, Digital Logic, Circuits & Analog, Electronics, Programming C++/Java

TECHNICAL SKILLS

Programming Languages: Java, HTML/CSS, JavaScript, C++, Python, SQL

Cloud & Platforms: Amazon Web Services, Microsoft Azure, Azure Databricks, Azure Data Factory, Microsoft 365

Software & Frameworks: Git, Docker, Spring Boot

WORK EXPERIENCE

McKesson - CoverMyMeds

Columbus, OH

CMM Technology Intern - Data and Applied AI

June 2026 - August 2026

- Engineered a data ontology model to structure and classify large volumes of unorganized data related to Vulnerability and Endpoint Security in Azure Databricks, enabling the platform's AI to sort records and surface relationships across previously isolated data sources with greater accuracy
- Developed an AI model on top of the ontology that allows any user to explore and query the data in natural language, lowering the technical barrier to navigating the system
- Integrated the AI agent into Microsoft Teams to automate scheduled reporting, delivering recurring natural language data insights directly to stakeholders and eliminating manual report generation

Ohio State University - IT Service Desk

Columbus, OH

Student Analyst

March 2025 – Present

- Supported an average of 20–30 customers per week by troubleshooting hardware/software issues and resolving licensing errors, improving first-call resolution rate by 15%
- Delivered technical solutions while developing customer service skills, earning consistently positive feedback from supervisors and end users

PROJECTS

Secure File Upload (Java, Spring Boot, AWS S3, HTML, JavaScript, Docker)

- Developed a full-stack file upload platform using Spring Boot and Amazon S3, allowing users to securely upload, list, and delete files; tested 20+ file operations with <100ms response latency per action
- Containerized the app with Docker, deployed via Docker Compose, and published to Docker Hub with secure AWS key management and regional setup

Personal Portfolio Website (HTML, CSS, JavaScript, Tailwind CSS)

- Designed and hand coded a responsive single page portfolio in HTML, Tailwind CSS, and vanilla JavaScript, using a mobile-first layout tested across phone, tablet, and desktop
- Added a mobile navigation menu, smooth scrolling, and scroll triggered reveal animations in JS. Used semantic HTML and reduced-motion support for accessibility
- Deployed the live site for free using Git and GitHub Pages, delivering a polished web presence

Color Based Marble Sorter (C++, Arduino)

- Built an Arduino-powered marble sorter using C++ and servo motor control, achieving accurate color-based sorting with responsive input timing

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

ColorStack

Columbus, OH

National Member

March 2025 – Present

- Engaged with a national community of minority technologists through technical workshops, career development programming, and networking with industry partners
